CARATTERISTICHE / CHARACTERISTICS CARACTERISTICAS / CARATERISTIQUES

UTILIZZI - Pompe centrifughe multistadio verticali con bocche di aspirazione e mandata in linea. Movimentazione di liquidi non carichi nei settori civili, agricoli ed industriali; sistemi di pressurizzazione; irrigazione; acque potabili o con glicole in soluzione; trattamento acque; industria alimentare; riscaldamento e condizionamento; sistemi di lavaggio.

VANTAGGI - Versione monoblocco compatta con flangie ovali per ingombri ridotti; estrema silenziosità di funzionamento; ottimo rendimento con una notevole diminuzione dei costi d'esercizio e delle potenze impegnate; economica; cuscinetti motore sovradimensionati per una maggior durata; cuscinetto intermedio guida-albero che garantisce coassialità di rotazione.

CARATTERISTICHE COSTRUTTIVE - Portata fino a 26 m³/h; prevalenza fino a 125 m; pressione massima di esercizio 8 bar ≤ 6 giranti, 14 bar > 6 giranti; temperatura d'esercizio del liquido pompato: da +5 a +35 °C; temperatura ambiente max 40°C.

MOTORE - Motore a 2 poli ad induzione; monofase 230V – 50 Hz dotati di protezione termica fino a P2= 1,85 kW; trifase 230/400 V – 50 Hz; isolamento classe F; protezione IP 44.

MATERIALI - Flangie ovali aspirazione/mandata corpo pompa, disco tenuta meccanica: ghisa; camicia: acciaio cromo-nichel AISI 304; giranti, diffusori: Noryl® rinforzato con fibra di vetro (GFN2V); albero: acciaio cromo-nichel AISI 303; supporto motore: ghisa; tenuta meccanica: ceramica-grafite fino a 6 stadi / grafite-carburo di silicio da 7 stadi; cuscinetto intermedio guida-albero: ceramica-carburo di tungsteno.

USES - Vertical Multistage pumps with In-Line ports. Pumping of clean non-loaded fluids in the domestic, agricultural and industrial sectors; pressurizing systems; irrigation; drinking and glycol water; water treatment; food industry; heating and air conditioning; washing system.

ADVANTAGES - Compact close-coupled version with oval flanges for reduced encumber; silent; excellent efficiency that allows a reduction of running cost and powers; economical; over-dimensioned bearings for longer life of the machines; intermediate shaft guiding stage for concentricity of rotation.

CONSTRUCTION FEATURES - Capacity: up to 26 m³/h; total Head: up to 125 m.; maximum working pressure: 8 bar ≤ 6 impellers, 14 bar > 6 impellers; maximum liquid temperature: from +5 to +35 °C; ambient temperature: max 40 °C.

MOTOR - 2 pole induction motor; single phase 230V - 50Hz with thermal protector up to P2= 1,85 kW; three phase 230-400V - 50 Hz; insulation class F; protection degree IP44.

MATERIALS - Oval flanged suction and delivery pump body, mechanical seal disc holder: cast iron; shell: chromo-nickel steel AISI 304; impellers, diffusers: Noryl® reinforced with fiber glass (GFN2V); pump shaft: AISI 303 chromo-nickel steel; motor bracket: cast iron; mechanical seal: ceramic-graphite up to 6 stages - graphite-silicon carbide from 7 stages; intermediate shaft guiding stage bush: ceramic-tungsten carbide.

UTILIZACIONES - Bombas centrífugas multietapas verticales con bocas de aspiración y de envío en línea. Bombeo de líquidos químicamente y mecánicamente no agresivos en el sector doméstico, agrícola e industria; sistemas de presurización; riegos; agua potable o con glicol; tratamientos del agua; industria alimenticia; calefacción y refrigeración; sistemas de lavado.

VENTAJAS - Versión monobloc compacta con bridas ovales; extrema silenziosidad de funcionamiento; excelente rendimiento con desminución de los costes de ejercicio y de las potencias; económica; cojinetes del motor sobredimensionados para una mayor duración; cojinete intermedio guía-eje que garantiza la coaxialidad de rotación.

CARACTERÍSTICAS CONSTRUCTIVAS - Caudal hasta los 26 m³/h; prevalencia hasta los 125 mt.; máxima presión de ejercicio 8 bar ≤ 6 rodetes, 14 bar > 6 rodetes; temperatura de ejercicio del liquido bombeado: de +5 a +35 °C; temperatura del ambiente max 40°C.

MOTOR - Motor de 2 polos a inducción; monofasico 230v-50hz dotado de protección térmica hasta P2= 1,85 kW; trifasico 230/400v-50hz; aislamiento clase F; protección IP44.

MATERIALES - Bridas ovales de aspiración/envío cuerpo bomba, disco sello mecánico: fundición; camicia: acero cromo-nichel AISI304; rodetes, difusores: Noryl® reforzado con fibra de vidrio (GFN2V); eje: acero cromo-nichel AISI303; soporte motor: fundición; sello mecánico: cerámica-grafito hasta los 6 estadios - grafito-carburo de silicio de los 7 estadios; cojinete intermedio guía-eje: ceramica-carburo de tungsteno.

UTILISATION - Pompes centrifuges multicellulaires verticales avec bouches d'aspiration et refoulement en ligne. Pour le pompage d'eaux propres non chargées pour des applications domestiques, agricoles, industrielles; groupes de surpression; irrigation; eau potable ou solution de glycol; traitement des eaux; industrie alimentaire; chauffage et Climatisation; stations de lavage auto.

AVANTAGES - Version monobloc compacte avec bridas ovales pour encombrements réduits; silencieux; rendement excellent avec une diminution remarquable des coût de fontionnement et des puissance; économique; roulements surdimensionnés et étage de guidage intermédiaire pour une durée de vie prolongée des machines; roulement intermédiaire étage de guidage qui garantie le coaxialité de rotation.

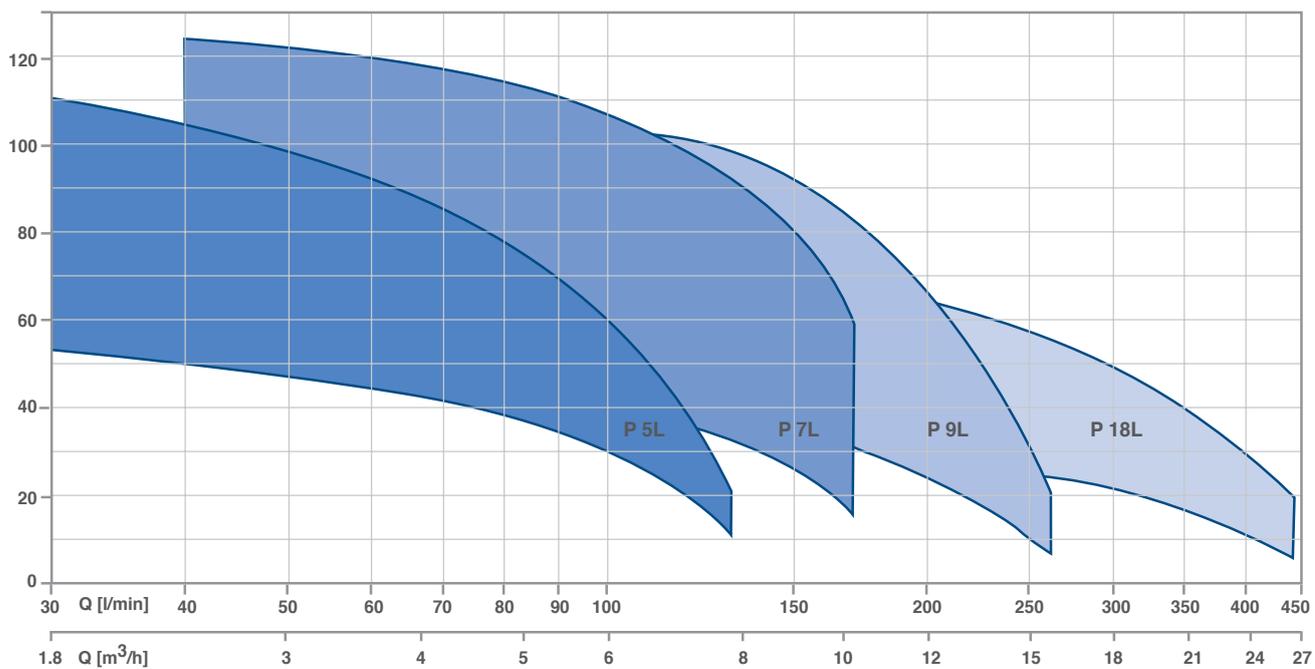

CARACTÉRISTIQUES D'EXÉCUTION - Débit jusqu'à 26 m³/h; hauteur jusque'à 125 m.; pression max. de fonctionnement 8 bar ≤ 6 roues, 14 bar > 6 roues; température du liquide pompé: de +5 à +35 °C; température ambiante max 40 °C.

MOTEUR - Moteur 2 pôles à induction; monophasé 230 V – 50 Hz avec protection thermique jusqu'à P2= 1,85 Kw; triphasé 230/400 V – 50 Hz; isolation en classe F; degré de protection IP 44.

MATERIAUX - Bridas ovales corps de pompe, disque porte-garniture: fonte; chemise externe: acier au chrome-nichel AISI 304; roues, diffuseurs: Noryl® renforcé avec fibre de verre (GFN2V); arbre: acier au chrome-nichel AISI 303; support moteur: fonte; garniture mécanique: céramique – graphite jusqu'à 6 étages, graphite - carbure de silicium à partir de plus de 7 étages; douilles étage de guidage intermédiaire: céramique -carbure de tungstène.
